

Double degrees

Think big - 2 undergraduate degrees, 2 universities, 2 countries in less than 4 years. A truly international experience.

Business today requires international exposure and an international experience is guaranteed for all business students by the SRH University Heidelberg business school.

To equip students with an international experience students at the School of Business can choose to either earn a 2nd degree* from a partner university or take a semester abroad. Graduates of a double degree program will be awarded two degrees, one from each country. This provides 2 internationally recognised degrees from 2 different countries.

The combination of experiences from 2 cultures will help develop social, intercultural and communication skills, promote a global outlook and enhance your employability prospects.
